Jaquar's Luxstudio

Imagine a space where the boundaries between architecture and light are blurred? The Luxstudio by Jaquar, in New Delhi, is a first-of-its-kind light studio where a wide range of architectural lighting solutions is showcased in an applied scenario.

The designers of the studio, Harmeet Singh Issar and Nivedita Sehwat of Design Matrix, say “we took the three constructs of space, time and light and merged them together to create an experience that is unpretentious, unexpected, fluid in form and program, and dignified yet engaging.”

Unlike the usual design of experience centres for lighting that typically tends to fall into two categories - white, matte minimalism driven by surface textures, or a dark, edgier aesthetic emphasizing contrasts- the design of Luxstudio amalgamates and represents both these approaches.

Dark, solid, charcoal grey walls of the Studio, contrast with luminous, textural ‘light’ partitions. Both sit side by side in an amorphous, flowing plan. Designed to be flexible, the space is both a blank canvas for lighting experiments - making allowance for tests and trials, as well as an evaluating space for light/light quality - in the Dark Room. The setting of the Luxstudio itself is a display of Jaquar's lighting capability and possibilities.

To discover how Jaquar's lighting range carries forward the legacy of the brand's commitment to excellence in bathroom fixtures, quality and customer satisfaction, the Luxstudio is a perfect showcase of possibilities and ideas for everyone who's planning to create buildings and spaces that are illuminated brilliantly.
